Authority have been established and are transmitted herewi  Filing of amendments and statement under Article 19: The applicant is entitled, if he so wishes, to amend the claim  When? The time limit for filing such amendments is nore International Search Report; however, for more  Where? Directly to the International Bureau of WIPO, 34 1211 Geneva 20, Switzerland, Fa  For more detailed instructions, see the notes on the acco  2. The applicant is hereby notified that no international search Article 17(2)(a) to that effect and the written opinion of the In  3. With regard to the protest against payment of (an) addition  the protest together with the decision thereon has been	ans of the International Application (see Rule 46): mally 2 months from the date of transmittal of the details, see the notes on the accompanying sheet. The chemin des Colombettes secimile No.: (41–22) 740.14.35 Impanying sheet.  The report will be established and that the declaration under international Searching Authority are transmitted herewith. In all fee(s) under Rule 40.2, the applicant is notified that: In transmitted to the International Bureau together with the test and the decision thereon to the designated Offices. Indicant will be notified as soon as a decision is made.  The international application will be published by the publication, a notice of withdrawal of the international ureau as provided in Rules 90 bis. 1 and 90 bis. 3, respectively, that publication.  Written opinion of the International Searching Authority to the such comments to all designated Offices unless an istablished. These comments would also be made available to only date.  The designated Offices, a demand for international preliminary tentry into the national phase until 30 months from the priority within 20 months from the priority date, perform the prescribed ces.  The formation of the priority date, perform the prescribed ces.

#### **NOTES TO FORM PCT/ISA/220**

These Notes are intended to give the basic instructions concerning the filing of amendments under article 19. The Notes are based on the requirements of the Patent Cooperation Treaty, the Regulations and the Administrative Instructions under that Treaty. In case of discrepancy between these Notes and those requirements, the latter are applicable. For more detailed information, see also the PCT Applicant's Guide, a publication of WIPO.

In these Notes, "Article", "Rule", and "Section" refer to the provisions of the PCT, the PCT Regulations and the PCT Administrative Instructions respectively.

### **INSTRUCTIONS CONCERNING AMENDMENTS UNDER ARTICLE 19**

The applicant has, after having received the international search report, one opportunity to amend the claims of the international application. It should however be emphasized that, since all parts of the international application (claims, description and drawings) may be amended during the international preliminary examination procedure, there is usually no need to file amendments of the claims under Article 19 except where, e.g. the applicant wants the latter to be published for the purposes of provisional protection or has another reason for amending the claims before international publication. Furthermore, it should be emphasized that provisional protection is available in some States only.

#### What parts of the international application may be amended?

Under Article 19, only the claims may be amended.

During the international phase, the claims may also be amended (or further amended) under Article 34 before the International Preliminary Examining Authority. The description and drawings may only be amended under Article 34 before the International Examining Authority.

Upon entry into the national phase, all parts of the international application may be amended under Article 28 or, where applicable, Article 41.

#### When?

Within 2 months from the date of transmittal of the international search report or 16 months from the priority date, whichever time limit expires later. It should be noted, however, that the amendments will be considered as having been received on time if they are received by the International Bureau after the expiration of the applicable time limit but before the completion of the technical preparations for international publication (Rule 46.1).

#### Where not to file the amendments?

The amendments may only be filed with the International Bureau and not with the receiving Office or the International Searching Authority (Rule 46.2).

Where a demand for international preliminary examination has been is filed, see below.

#### How?

Either by cancelling one or more entire claims, by adding one or more new claims or by amending the text of one or more of the claims as filed.

A replacement sheet must be submitted for each sheet of the claims which, on account of an amendment or amendments, differs from the sheet originally filed.

All the claims appearing on a replacement sheet must be numbered in Arabic numerals. Where a claim is cancelled, no renumbering of the other claims is required. In all cases where claims are renumbered, they must be renumbered consecutively (Administrative Instructions, Section 205(b)).

The amendments must be made in the language in which the international application is to be published.

#### What documents must/may accompany the amendments?

Letter (Section 205(b)):

The amendments must be submitted with a letter.

The letter will not be published with the international application and the amended claims. It should not be confused with the "Statement under Article 19(1)" (see below, under "Statement under Article 19(1)").

The letter must be in English or French, at the choice of the applicant. However, if the language of the international application is English, the letter must be in English; if the language of the international application is French, the letter must be in French.

#### NOTES TO FORM PCT/ISA/220 (continued)

The letter must indicate the differences between the claims as filed and the claims as amended. It must, in particular, indicate, in connection with each claim appearing in the international application (it being understood that identical indications concerning several claims may be grouped), whether

- (i) the claim is unchanged;
- (ii) the claim is cancelled:
- (iii) the claim is new:
- (iv) the claim replaces one or more claims as filed;
- (v) the claim is the result of the division of a claim as filed.

## The following examples illustrate the manner in which amendments must be explained in the accompanying letter:

- [Where originally there were 48 claims and after amendment of some claims there are 51]:
   "Claims 1 to 29, 31, 32, 34, 35, 37 to 48 replaced by amended claims bearing the same numbers; claims 30, 33 and 36 unchanged; new claims 49 to 51 added."
- [Where originally there were 15 claims and after amendment of all claims there are 11]:
   "Claims 1 to 15 replaced by amended claims 1 to 11."
- [Where originally there were 14 claims and the amendments consist in cancelling some claims and in adding new claims]:
   "Claims 1 to 6 and 14 unchanged; claims 7 to 13 cancelled; new claims 15, 16 and 17 added." or
   "Claims 7 to 13 cancelled; new claims 15, 16 and 17 added; all other claims unchanged."
- 4. [Where various kinds of amendments are made]: "Claims 1-10 unchanged; claims 11 to 13, 18 and 19 cancelled; claims 14, 15 and 16 replaced by amended claim 14; claim 17 subdivided into amended claims 15, 16 and 17; new claims 20 and 21 added."

### "Statement under article 19(1)" (Rule 46.4)

The amendments may be accompanied by a statement explaining the amendments and indicating any impact that such amendments might have on the description and the drawings (which cannot be amended under Article 19(1)).

The statement will be published with the international application and the amended claims.

### It must be in the language in which the international appplication is to be published.

It must be brief, not exceeding 500 words if in English or if translated into English.

It should not be confused with and does not replace the letter indicating the differences between the claims as filed and as amended. It must be filed on a separate sheet and must be identified as such by a heading, preferably by using the words "Statement under Article 19(1)."

It may not contain any disparaging comments on the international search report or the relevance of citations contained in that report. Reference to citations, relevant to a given claim, contained in the international search report may be made only in connection with an amendment of that claim.

## Consequence if a demand for international preliminary examination has already been filed

If, at the time of filing any amendments under Article 19, a demand for international preliminary examination has already been submitted, the applicant must preferably, at the same time of filing the amendments with the International Bureau, also file a copy of such amendments with the International Preliminary Examining Authority (see Rule 62.2(a), first sentence).

## Consequence with regard to translation of the international application for entry into the national phase

The applicant's attention is drawn to the fact that, where upon entry into the national phase, a translation of the claims as amended under Article 19 may have to be furnished to the designated/elected Offices, instead of, or in addition to, the translation of the claims as filed.

For further details on the requirements of each designated/elected Office, see Volume II of the PCT Applicant's Guide.

## JC20 Rec'd PCT/PTO 28 SEP 2005

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY (SEPARATE SHEET)

International application No.

PCT/EP2004/004918

### Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Reference is made to the following document:

D1: US-A-6 041 861 (STANDLEY THOMAS ET AL) 28 March 2000 (2000-03-28)

- 1. The document D1 is regarded as being the closest prior art to the subject-matter of claim 1 and shows a method for determining components of a tube casing by measuring attenuation of acoustic waves by inverting a system of equations.
- 2.1 The subject-matter of claim 1 differs from this known D1 in that it calculates the unknown value φ<sub>D</sub> that is the percentage of the cement de-bonded by inverting a system of three equations and three unknowns, after having first measured attenuation of acoustic waves in a free pipe, in a fully cemented pipe and in fully de-bonded pipe.
- 2.2 In contrast, D1 uses a ten step method that includes the determination of <u>peak</u> amplitudes and a <u>FFT</u> of the above amplitudes that leads to the inversion of <u>nine</u> equations (see Fugures 6A and 6B, Col 8, lines 34-35).
- 2.3 The subject-matter of claim 1 is therefore new (Article 33(2) PCT).
- 3.1 The problem to be solved by the present invention may be regarded as how to determine n<sub>D</sub> that is the percentage of the cement de-bonded from the tube casing, by measuring attenuation of acoustic waves in a pipe under real conditions.
- 3.2 The solution to this problem proposed in claim 1 of the present application is considered as involving an inventive step (Article 33(3) PCT) as it first measures attenuation of acoustic waves under three different (but known) conditions (free-pipe, fully bonbed pipe and fully de-bonded pipe) then measure attenuation of the waves under real (unknown) conditions and then inverts a system of three

equations in which the three unknowns are the three percentages n<sub>c</sub>, n<sub>w</sub>, n<sub>D</sub>.

- 4. Independent claims 2 and 3 are also based on the central distinctive feature of claim 1, that is the inversion of the three equations system for determining the unknown n<sub>D</sub>, but applies to measurement of a coupling amplitude, respectively the combination of attenuation and coupling amplitude. For the same reasons given above they also meet the requirements of the PCT with respect to novelty and inventive step.
- 5. The same consideration applies for the dependent claim 4.
- 6. The method finds industrial applicability in the field of tube casings in boreholes.
